

MASTERPAV STAMPED CONCRETE

A proven system that livens up your concrete slab works! Not only it can give a stone slate-like effect to your concrete, it also comes in many different colours, textures and patterns.

The patterns are imprinted onto the concrete* and the finished surfaces are then sealed with two coats of sealer, giving your stamped surfaces a brighter look and easy maintenance.

*The concrete base for stamped concrete works may require a different mix from normal concrete specification. Ideal for driveways, car parks, walkways, shopping centre, pool surrounds & courtyards.
